

State of the Family in Nevada

The [United States Family Belonging Index](#) is 46 percent, with a corresponding Family Rejection Index of 54 percent, based on 2008-2012 data from the U.S. Census Bureau’s American Community Survey. The action of parents determines the Family Belonging or Rejection Index within a nation, region, [state](#), or [racial or ethnic group](#)—whether they marry and belong to each other, or whether they reject one another through divorce or other means. Rejection leaves children without married parents committed to one another and to their children.

The Index of Family Belonging is determined by the fraction of children aged 15 to 17 in a given area who live with both their biological parents, who have been married since before or around the time of their birth.

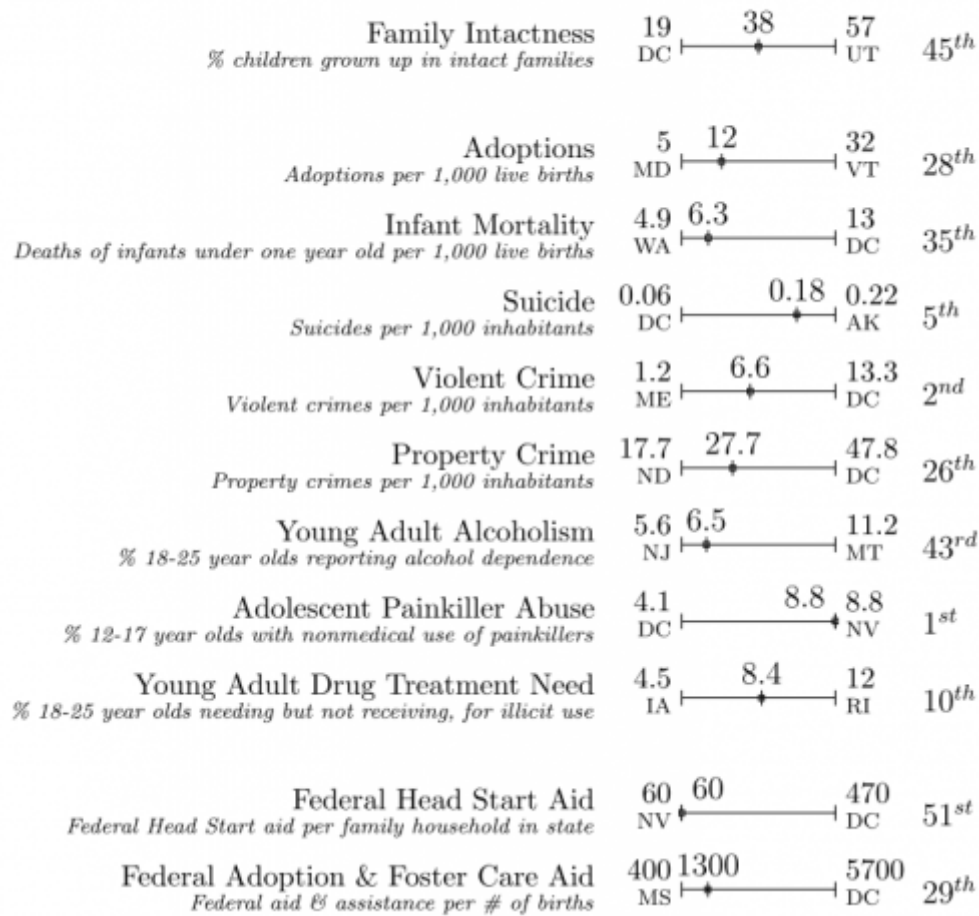

1. Index of Belonging

Nevada has a Family Belonging Index of 38 percent. In other words, 38 percent of Nevada teenagers aged 15 to 17 have lived with their always-married parents since their birth, whereas 62 percent of these adolescents were raised in a non-intact family. Nevada ranks 48th on the [state ranking](#) of the Index of Belonging and Rejection.¹⁾

2. Outcomes by Index of Belonging

Significant outcomes: Location between states at the extremes followed by state ranking, for Nevada

2.1 Youth Outcomes

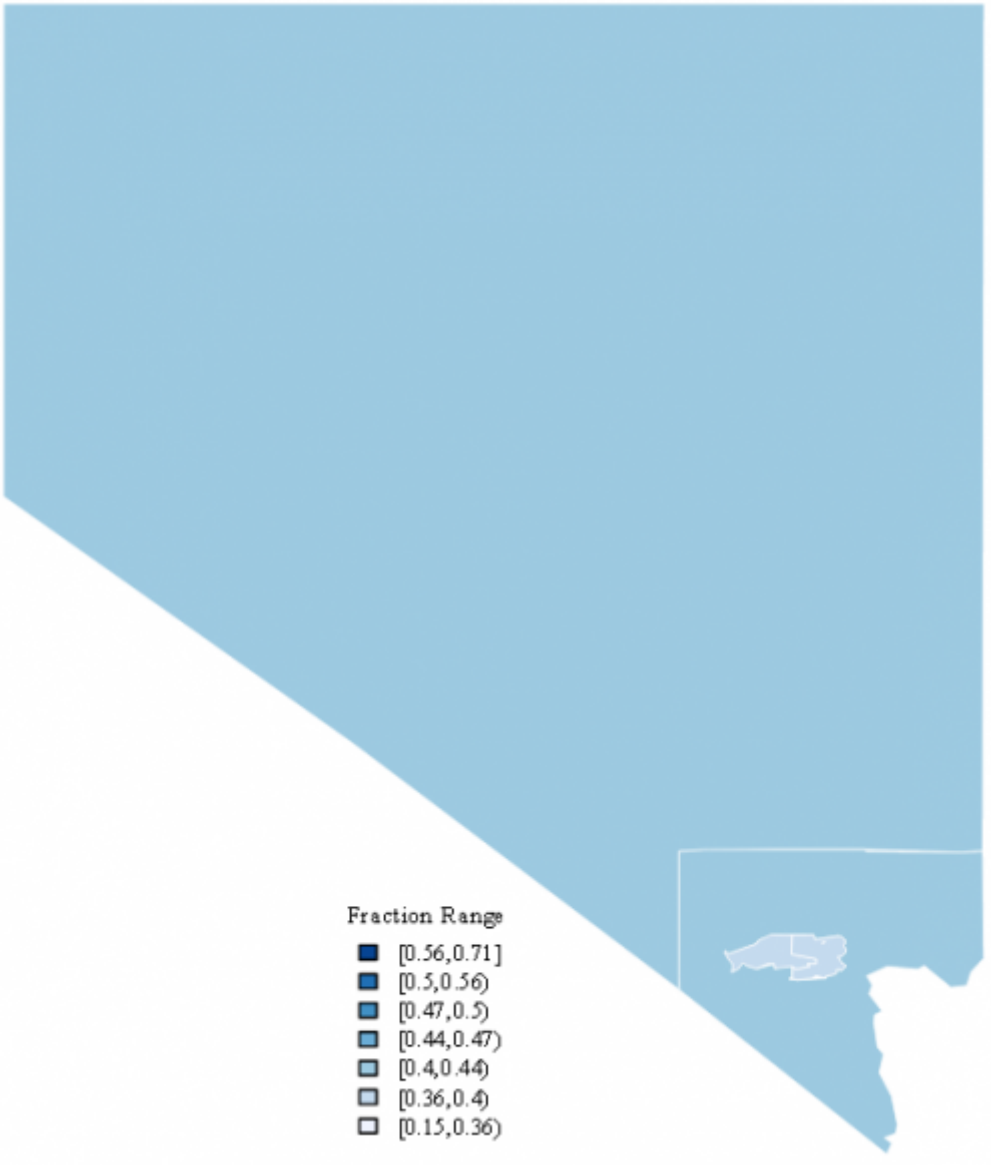

Youth Outcomes	Nevada	Weakest State	Strongest State
Graduation rates (high school)	51.3	51.3 (NV)	89.6 (WI)
NAEP reading scores (eighth grade)	254	251 (MS)*	274 (MA)
Child poverty (percent in)	18%	31% (MS)	11% (NH)
Births to unmarried teenagers (percent of)	9.2%	14.1% (MS)	5.3% (UT)

3. Mapping Nevada

See [Effects of Family Structure on Policy Outcomes](#)

3.1 Family Intactness

Fraction of Families Intact

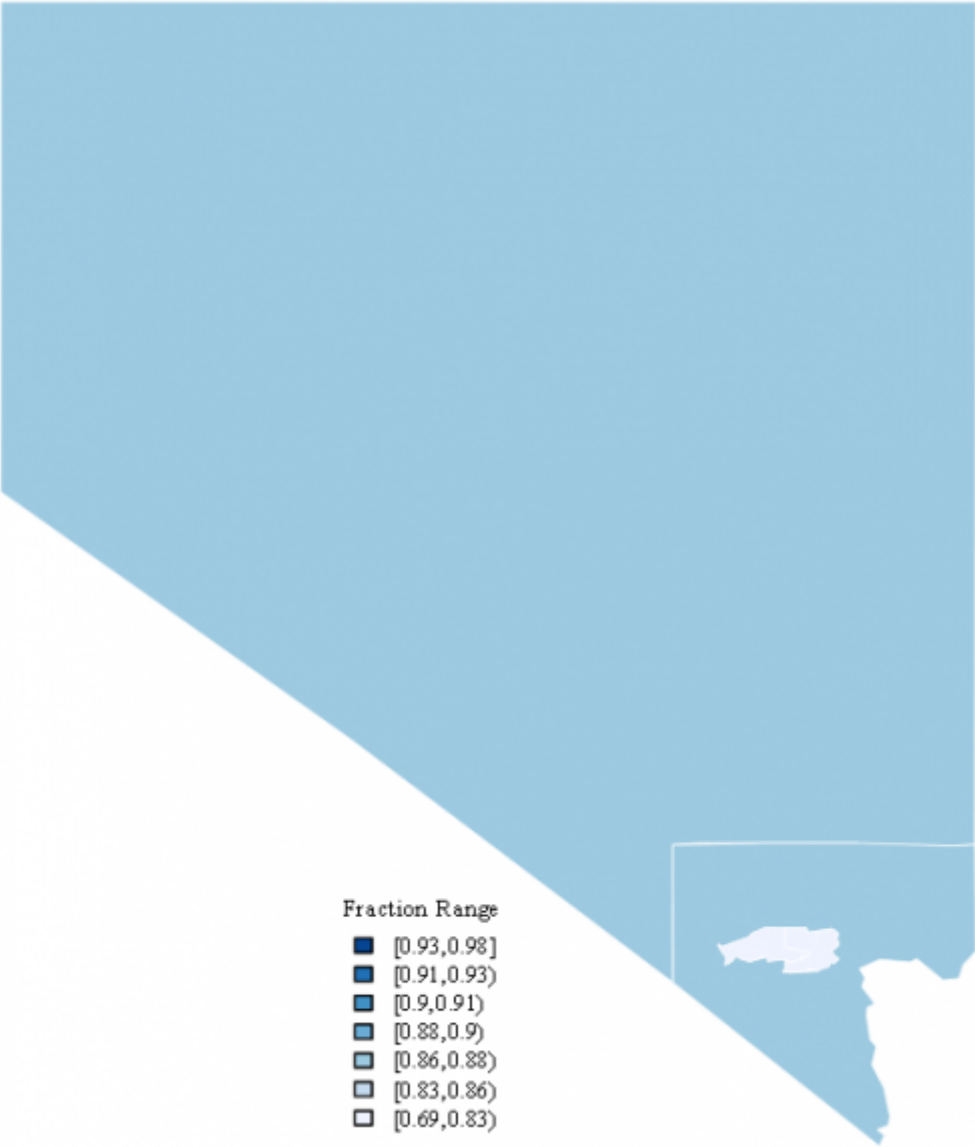

3.2 Teenage Out-of-Wedlock Births

Fraction of teenage out-of-wedlock births out of all births
