

State of the Family in North Carolina

The [United States Family Belonging Index](#) is 46 percent, with a corresponding Family Rejection Index of 54 percent, based on 2008-2012 data from the U.S. Census Bureau’s American Community Survey. The action of parents determines the Family Belonging or Rejection Index within a nation, region, [state](#), or [racial or ethnic group](#)—whether they marry and belong to each other, or whether they reject one another through divorce or other means. Rejection leaves children without married parents committed to one another and to their children.

The Index of Family Belonging is determined by the fraction of children aged 15 to 17 in a given area who live with both their biological parents, who have been married since before or around the time of their birth.

1. Index of Belonging

North Carolina has a Family Belonging Index of 41.4 percent. In other words, 41.4 percent of North Carolina teenagers aged 15 to 17 have lived with their always-married parents since their birth, whereas 58.6 percent of these adolescents were raised in a non-intact family. North Carolina ranks 38th on the [state ranking](#) of the Index of Belonging and Rejection.¹⁾
